1 April 1965

MEMORANDUM FOR: Assistant for Plans and Development, NPIC

SUBJECT : Request for Copy Camera Study

1. The Collateral Support Division is in need of a copy camera that will enable Division personnel to copy material from publications for use within the Division as well as to provide more efficient support to NPIC components.

2. The requirements for such study should include:

- a. CAMERA - To be as fool-proof as possible, yet permit quick result, good quality reproductions. It should have auto-focus and auto-exposure control characteristics with the capability of producing film or paper reproductions in the 70 MM, 100 MM or 120 MM sizes. It should have dry or immediate film developing such as polaroid and also an attachment to permit wet developing capability.
- b. STAND - To include: camera attachment mountings, subject platform or easel, attachments for light source, and be light in weight and easily transportable.
- c. COPIER - Consideration should be given to a copier to permit quick reproductions from the original.

3. The Division has a need for at least two cameras of the type. If the above listed requirements cannot be found in on-the-shelf copy camera equipment, it is requested that P&DS investigate the possibility of having one developed if it is found to be within practical limits. Also, the Division has investigated the [redacted] system, but found this to be too complex and too difficult to operate.

[redacted]  
Chief, Collateral Support Division,  
NPIC
